NOTE TO PHYSICIAN: No specific antidote. Treat symptomatically. The compound

5. Fire Fighting Measures:

EXTINGUISHING MEDIA: Foam, dry chemical, carbon dioxide, or water spray

SPECIFIC HAZARDS ARISING FROM THE CHEMICAL: Can burn in fire, releasing toxic gases from thermal decomposition and combustion

SPECIAL PROTECTIVE ACTIONS FOR FIRE FIGHTERS: Evacuate area and fight fire upwind from a safe distance to avoid hazardous vapors and decomposition products. Fire exposed containers can build up pressure and should be kept cool with water spray if possible. Dike and collect water used to fight fire to prevent environmental damage due to runoff.

6. Accidental Release Measures:

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

PERSONAL PRECAUTIONS: Follow protective measures indicated in Section 8: Exposure Control/Personal Protection for both emergency personnel. Keep unnecessary and unprotected personnel from entering.

ENVIRONMENTAL PRECAUTIONS: Do not allow material to enter streams, sewers, or other waterways or contact vegetation.

METHODS FOR CLEANING UP:

SMALL SPILL: Absorb small spills with sand, vermiculite or other inert absorbent. Place contaminated material in appropriate container for disposal.

LARGE SPILL: Dike large spills using absorbent or impervious material such as clay or sand. Recover and contain as much free liquid as possible for reuse. Allow absorbed material to solidify, and scrape up for disposal. After removal, clean contaminated area thoroughly with water. Pick up wash liquid with additional absorbent and place in a disposable container.

7. Handling and Storage:

HANDLING AND STORAGE PRECAUTIONS:

HANDLING: Use only in well ventilated area. Avoid contact with acidic and oxidizing materials through handling. Handle and open container in a manner to prevent spillage. If container is leaking, invert to prevent leakage. If leakage or spill has occurred refer to Section 6 of this document.

STORAGE: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of reach of children, preferably in a locked storage area and away from acidic and oxidizing materials. Store above 28°F or agitate before use.

8. Exposure Control/Personal Protection:

EXPOSURE GUIDELINES: Occupational exposure limit (OEL) and biological limit values (BLV) for Tebuconazole – CAS No.: 107534-96-3 not established, control banding approach not available.

APPROPRIATE ENGINEERING CONTROLS: Use sufficient ventilation to avoid buildup of vapors.

WORK/HYGIENE PRACTICES: Emergency shower and eyewash facilities should be in close proximity (ANSI Z358.1). Launder contaminated clothing and wash hands and face after use. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

The following personal protective equipment should be used in conjunction with exposure control measures:

EYE/FACE PROTECTION: Safety glasses or goggles

SKIN PROTECTION: Long sleeve shirt, long pants and shoes plus socks

RESPIRATORY PROTECTION: None

HAND PROTECTION: Chemical-resistant gloves, such as barrier laminate, or butyl rubber or nitrile rubber or neoprene rubber or polyvinyl chloride or Viton.
